AMENDMENTS TO THE SPECIFICATION

Please amend the Specification as follows:

Amend the paragraph on pages 10-11, lines 14-17, as follows:

Figure 3 is a flowchart of an embodiment of a method for context-aware computer management using smart badges. A computer-usable medium embodying computer program code for the context-aware computer management is provided. The method begins in step 302 where wearers enter a secure booth and authenticate their smart badge. During authentication, the smart badge is reset to an initial state. Resetting the badge erases all prior credentials and stored data.
